FAUSTO GARGANO

ENVIRONMENT

POSITIVE ASPECTS	NEGATIVE ASPECTS
AIR	POLLUTION POOR AIR QUALITY

I used these pictures because I think they are good in representing these words.

1- The first photo represents the air. In this photo you can see clouds in a morning sky;
2- The second photo represents the pollution. In this photo there is an industry that releases toxic gases in the air;
3- The third photo represents the ''poor air quality''. In this photo you can see the London sky.

MARTINO PERITO

In the first picture I introduce the fumes, in the second picture the dirty air, in the third picture the pollution and in the fourth picture the traffic jam. All these pictures represent the environmental damage

FRANCESCO CELEBRE

I chose these pictures because they make us understand that all nature has been polluted since when people created industries.

Federico Marco

I chose these two images because they represent my idea of environmental impact very well.
The man acts heavily on the environmental impact of the planet because, since the industrial revolutions, the environment has been polluted. We must take good care of nature.
