

Flies

-Dog

Eg *Musca domestica* (House fly) , *Hippobosca maculate*

CS- Irritation by larva may produce septic wound and holes in the skin

Painful cutaneous wound filled with larva (maggot wound-myiasis)

Tx- Fly repellents should be use to minimize the fly infestations

- Oil of turpentine
- Oil eucalyptus
- BHC or OPCs to destroy the maggots
- Topical antiseptics and antibiotics solutions to check secondary bacterial infection

-Cat

Eg *Musca domestica* (House fly)

CS- Irritation by larva may produce septic wound and holes in the skin

Painful cutaneous wound filled with larva (maggot wound-myiasis)

Tx- Fly repellents should be use to minimize the fly infestations

- Oil of turpentine
- Oil eucalyptus
- BHC or OPCs to destroy the maggots
